COURSE DESCRIPTION: The Produce Safety Alliance (PSA) Grower Training Course has been designed to provide a foundation of Good Agricultural Practices knowledge that includes emphasis on co-management of food safety and environmental management goals, while outlining the requirements of the Food Safety Modernization Act (FSMA) Produce Safety Rule. The PSA Grower Training Course is one way to satisfy the FSMA Produce Safety Rule requirement outlined in § 112.22(c) that requires ‘At least one supervisor or responsible party for your farm must have successfully completed food safety training at least equivalent to that received under standardized curriculum recognized as adequate by the Food and Drug Administration.’

In order to obtain a certificate that provides evidence of compliance with the training requirements of the rule, you must be present for the entire two-day course, so do not make plans for the snow date!

Funding for this statement, publication, press release, etc. was made possible, in part, by the Food and Drug Administration through grant PAR-16-137. The views expressed in written materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services; nor does any mention of trade names, commercial practices, or organization imply endorsement by the United States Government.
